# FLOORMAX™ Elastomeric Crack Filler

FLOORMAX™ Coatings Elastomeric Crack Filler is an economical and extremely durable way for anyone to fix joints, cracks, and seams in concrete where ongoing movement may occur. FLOORMAX™ Coatings Elastomeric Crack Filler may also be used in applications where a strong flexible adhesive bond is required between concrete, rocks, stone, brick, or other materials normally found in construction. This 100% solids Elastomeric Crack Filler will expand and contract with the surface as it expands and/or contracts.

**Structural Crack Repair**

## EASY TO USE

- One to One Mix Ratio
- Excellent vertical hold - stays where you put it

## EXCELLENT ADHESION, DURABILITY

- Bonds to most masonry and building materials
- Permanently fills and waterproofs all cracks & joints
- Very resistant to incidental contact with both oils and typical automotive chemicals
- It possesses over 1500 PSI tensile strength

## 100% SOLIDS, NO SOLVENTS OR VOC's

- No "Flash Off" of solvents, low odor application

**Stress Crack Repairs**

**Concrete Defect Repair**

## Multiple Applications

- Basins & Reservoirs
- Cold Storage Areas
- Concrete Decks
- Concrete Restoration
- Control Joints
- Crack Filler
- Equipment Wash-Down Areas
- Expansion Joints
- Fish Hatcheries
- Fish Ponds (non-plastic)
- Foundation Coatings
- Garage Floor Coatings
- Laboratory Floors
