## FLOORMAX™ Polyurea High Performance Coating

FLOORMAX™ Coatings Polyurea High Performance Coating is the next generation in advanced floor coatings. Featuring Ultra-High Solids, Zero VOC's and Zero Water content, it enables the user to be environmentally friendly while enjoying a fast setting superior barrier type coating. This UV stable system is waterproof, very resistant to automotive chemicals commonly found in the garage, and maintains hardness while being flexible to resist cracking. This high performance system is designed for the DIY'er and contractor markets.

High Gloss Finish

### EASY TO USE

- Brush/roll application allows applicator to use low cost simple equipment, saving time & money

### HIGH DURABILITY

- Over 1500 PSI tensile strength
- Greater than 80% elongation
- Very resistant to common automotive chemicals
- Resistant to UV; chalking, fading, & color change normally associated with epoxy based coatings

### ULTRA-HIGH SOLIDS, NO VOC's

- Protects the Environment and the Ozone layer

Concrete Restoration

Slip Resistant Finish

### Multiple Applications

- Basins & Reservoirs
- Bridge Coatings
- Concrete Decks
- Concrete Restoration
- Cooling Tower Linings
- Equipment Wash-Down Areas
- Foundation Coatings
- Garage Floor Coatings
- Highway Construction (*overpasses/metal culverts*)
- Man-Hole and Sewer Linings
- Parking Structure Concrete Coatings
- Pool Deck Coating
- Terrace Floors
- Tractor Trailer Floors
- Traffic Bearing Waterproofing
- Truck Freight Ramps
- Tunnels
- Water Runoff/Overflow Areas
- Water Treatment Plants
- Waterpark Features & Repairs
- Waterproofing Applications

AND SO MUCH MORE...
